### Helps Digestion

- Up to 25% less forage needed
- Helps combat digestive colicing
- Helps hard-keepers gain weight
- Digestive pH less acidic
- Better nutrient uptake
- Distillers grains and solubles
- Complex carbohydrate energy
- Not simple sugars like molasses
- Balanced minerals and vitamins
- Organic complexed trace minerals

### Helps Health

- Shiny, healthy hair coat
- Strong, solid hooves
- Better lubricity of joints
- Bright, clear eyes
- Better circulation
- Stronger immunity

### Helps Performance

- Improved temperament
- Better endurance
- Better strength
- Better fertility
- Less getting hot or high
- Helps speed training recovery

REV 09-2013

**EQUIPRIDE** is a top dress you add to your horse's daily rations. Just add 1 oz of the loose meal per 100 lbs of body weight – typically 10 oz for a 1,000 lb horse.

It's an "all-in-one" vitamin and mineral supplement with strong prebiotics and enzymatic digestive aids that minimize the need for multiple supplements.

EquiPride complements forages to help improve hooves, hair coat, joint lubricity, feed utilization, circulation and prevention of colic.

It helps maximize nutrient uptake, improve appearance, increase performance and enhance immune function.

### EquiPride®

Available in 25 lb buckets and 50 lb bags

**EQUILIX** is a free choice lick block for your horse. Unlike molasses based supplements it's all-season, weather resistant and won't melt in summer heat.

As an "all-in-one" vitamin and mineral supplement for horses, EquiLix blocks include a complete vitamin and mineral package, with strong prebiotic and enzymatic digestive aids for better horse health and performance.

Your horse can instinctively meter its intake of EquiLix, to get the amount of vitamins, minerals and nutrients it needs. Hooves get stronger, hair coat gets shinier, circulation and digestion improve, temperament gets better and immune system function works optimally.

### EquiLix®

Available in 50 lb lick blocks and 125 lb lick blocks

## EquiPride® and EquiLix®

EquiPride and EquiLix are advanced non-molasses supplements that provide a complete vitamin, mineral and digestive aid, with buffers, prebiotics and ProBiotein® for optimum horse health and performance.

**NO MOLASSES** – EquiLix blocks provide complex carbohydrates, versus the simple sugars of molasses that can shift the body's pH to acidic, causing digestive disruption. Complex carbohydrates are nutritionally superior and unlike molasses, all-season EquiLix blocks are weather resistant and won't melt in summer heat.

**DIGESTION** – Horses produce less amylase, the starch and sugar digestive enzyme, than most other animals do. So the chances are greater for undigested starch from grains, or sugar from molasses to reach the hindgut. If they do, they force a shift in the microbial population, lower the pH, and can allow pathogenic microbes to gain a foothold. This can lead to digestive colic and other horse health problems.

**DISTILLERS GRAINS** – Because EquiPride and EquiLix have a unique blend of enzymes and prebiotics, the chances of this happening are less. The ingredients have been externally processed (fermented) so they come “pre-digested” for your horse. This improves feed efficiency, nutrient utilization of the entire ration and promotes good horse health. Beginning with dried distillers grains and condensed distillers solubles, these supplements have an acid fighting blend of calcium and magnesium, plus ProBiotein.

### PROBIOTEIN® –

ProBiotein is a proprietary blend additive made of

yeast culture, 4 prebiotic oligosaccharides, enzymes and protein isolates. The yeast in ProBiotein is cultured on a media of wheat, oats, barley malt and flax. This broadens the amino acid balance of the ration. And, it is rich in biotin and other nutrients to aid digestion.

**PREBIOTICS** – Our dietary fibers are often called “prebiotics” because they preferentially feed beneficial digestive system “probiotic” bacteria. In so doing, the beneficial bacteria flourish, improving feed utilization and efficiency up to 25%, while “competitively excluding” pathogenic bacteria which can cause illness. Our 4 classes of prebiotics help maintain good digestive health which in turn supports your horse's immune system response and overall health.

### GUARANTEED ANALYSIS

		MEAL	BLOCK
NUTRIENT		EQUIPRIDE	EQUILIX
CRUDE PROTEIN	MIN	14.00%	12.00%
OMEGA-3 FATTY ACID	MIN	0.55%	0.40%
CRUDE FAT	MIN	5.50%	6.00%

VITAMIN D	IU/LB	20,000	20,000
VITAMIN E	IU/LB	350	350

#### EQUIPRIDE DIGESTIVE ENZYME ACTIVITY (at time of manufacture):

**Alpha-Amylase** (from barley malt, *Aspergillus oryzae*) 34,180 ug starch hydrolyzed/min/oz. **Amyloglucosidase** (from *Aspergillus niger*, *Aspergillus oryzae*) 4,540 ug maltose hydrolyzed/min/oz.

#### EQUILIX DIGESTIVE ENZYME ACTIVITY (at time of manufacture):

**Alpha-Amylase** (from barley malt, *Aspergillus oryzae*) 10,180 ug starch hydrolyzed/min/oz. **Amyloglucosidase** (from *Aspergillus niger*, *Aspergillus oryzae*) 1,540 ug maltose hydrolyzed/min/oz.

**INGREDIENTS** – ProBiotein® (yeast culture on a fermented media of wheat, oats, barley malt and flax), Distillers Dried Grains with Solubles, Salt, Ground Flax, Calcium Sulfate, Monocalcium Phosphate, Magnesium Oxide, Potassium Chloride, Copper Proteinates, Zinc Proteinates, Manganese Proteinates, Zinc Sulfate, Copper Sulfate, Manganese Sulfate, Cobalt Carbonate, Sodium Selenite, Ethylenediamine Dihydrate, *Aspergillus Oryzae* Fermentation Product Dehydrated, *Aspergillus Niger* Fermentation Product Liquid, Vitamin A Acetate, Vitamin D3, Vitamin E Supplement, d-Biotin. **EquiLix also has** – Pea Meal, Diatomaceous Earth, Vegetable Oil.

**ENZYMES** – ProBiotein also includes 4 classes of digestive enzymes. The fibrinolytic, amylolytic, phospholytic and proteolytic enzymes in ProBiotein are catalysts that help your horse improve its digestion of fiber, starch, minerals and protein.

**OMEGA-3** – EquiPride and EquiLix also contain flax, with its important Omega-3 that supports healthy joints, clear eyes and shiny coats. Oil from flax is dense energy that is high in important fatty acid content. Omega-3 is an essential fatty acid that's often missing in animal diets. Flax is also among the richest sources of lignans, which help improve immune function.

**MINERALS** – In addition to a proper complement of macro minerals, the trace minerals zinc, manganese and copper are organically complexed for higher bioavailability. And in EquiPride, there's ethyl alcohol that improves palatability, enhances fiber digestion and adds another non-starch energy source.

**IT MAKES SENSE** – In the past, horse owners have been content with the overall convenience of molasses blocks. But times have changed. These days you have to be concerned about net economic performance. EquiPride's and EquiLix's marked improvements in feed efficiency, energy delivery and vitamin/mineral science, improve your net economic performance, while improving your horse's performance and health.

**GET SERIOUS** – Your resource dollars are important. Finally there's a clearly different, nutritionally superior product available. If you supplement your horses with a vitamin and mineral block or loose top dress, you should expect more than convenience. You deserve the quality, effectiveness, safety, performance and value of EquiPride and EquiLix.
